# Preview App on the Mac

## Bruce Mitchell Tom Bonanno Zoom SIG September 8, 2020

Preview is the image viewer and PDF viewer of the macOS operating system. In addition to viewing and printing digital images and Portable Document Format (PDF) files, it can also edit these media types.

PDFs are Portable Document Files

### **Preview is like a Swiss Army Knife**

## Preview is only available on a Mac

## What Preview Can't Do with a PDF in Preview

- Make a document from scratch
- Edit text or delete an image in a PDF
- OCR Optical Character Recognition
- Create a Table of Contents
- Can't create an interactive PDF with forms
- Can't export it to Word

## Preview can....

2 Scan from a scanner or printer with a flatbed tray

3 Crop, resize, and edit images

5 Convert images to many different formats

Take screenshots and import photos directly from a camera

## Preview File Edit View Go Tools Window

## How To Create a Single PDF From Multiple Documents On a Mac

You don't have to create a document all at once in a single app. You can take different documents from different apps like Pages, Numbers, Keynote, web reports, images and more, and combine them into a single PDF using Preview. This allows you to create pages of your document in the app best suited for that content.

## **Exploring Preferences in Preview (Overview)**

Name: Tom P Bonanno, Sr

## **Preferences in Preview**

In

"The moral of the story is that you shouldn't get too wrapped up in how large an image looks in Preview. If your image is destined for the screen, focus on the pixel dimensions."

Excerpt From: Josh Centers and Adam Engst. "Take Control of Preview (1.2)." Apple Books.

### Images

## **Preferences in Preview**

## PDF

## **Sidebar View**

- You don't really need to dig in Preferences.
- Just do this under View in Preview Sidebar Menu

## You can't make a Preview document from scratch

## **Open up an existing file**

## and a few other formats such as BMP, GIF, and JPEG 2000

Also opens Pages, Numbers, Keynote, even view a

Photoshop document .PSD even if you don't have Photoshop

### "Before you try to import from a scanner, make sure your scanner appears in System Preferences > Printers & Scanners."

Excerpt From: Josh Centers and Adam Engst. "Take Control of Preview (1.2)." Apple Books.

## If you do scan usually choose 300 dpi

## Some Ways to Import

- From the Clipboard /Copy and Paste
- Screenshot
- A Scanner
- From iPhone and iPad
- From a digital camera

### From iPhone

Must be on some wifi, bluetooth, same Apple ID File > Import Photo Take the Photo Select Use Photo

## In Preview use your iPhone or iPad to Scan

## File > Import from iPhone or iPad Scan Documents Take a picture Keep Scan and goes right to Preview

When scanning a document it isn't editable text

Preview	File Edit View Go	Tools Window	w Help

	Import from iPhone or iP Import from Camera Import from Scanner Take Screenshot	ad >	Tom P Bonanno,Sr's Take Photo Scan Documents Add Sketch
	Export As Export as PDF Share Print	₽	iPad (2) Take Photo Scan Documents Add Sketch

## You can do screenshots right in Preview

## File > Take Screenshot....

From Selection

• From Window

## Entire Screen 10 second countdown

### No need to remember Command-Shift 3, 4 or 5

## **Working with Images in Preview**

### Edit images

- Crop: Drag to select the crop area, then choose Tools > Crop.
- **Rotate**: Choose Tools > Rotate Left or Rotate Right.
- Adjust color: Choose Tools > Adjust Color, then drag a slider to make an adjustment.
- Adjust size: Choose Tools > Adjust Size, enter

the desired dimensions, then click OK.

## Preview is great for quick image adjustments.

### https://support.apple.com/guide/preview/fill-out-and-sign-pdf-forms-prvw35725/mac

Create and use signatures

To sign PDFs, you can capture your signature using your trackpad, the built-in camera on your Mac, or iPhone or iPad.

1. In the Preview app 🔜 on your Mac, if the Markup toolbar isn't showing, click the Show Markup Toolbar button (A), then click the Sign button  $\mathcal{P}_{\mathcal{P}}$ .

Follow the onscreen instructions to create and save your signature.

• Create a signature using your trackpad: Click Trackpad, click the text as prompted, sign your trackpad name on the trackpad using your finger, press any key, then click Done. If you don't like the results, click Clear, then try again.

> If your Mac has a Force Touch trackpad, you can press your finger more firmly on the trackpad to sign with a heavier, darker line.

computer camera • Create a signature using your computer's built-in camera. Click Camera. Hold your signature (on white paper) facing the camera so that your signature is level with the blue line in the window. When your signature appears in the window, click Done. If you don't like the results, click Clear, then try again.

### iPhone/ iPad

- Done. If you don't like the results, click Clear, then try again.
- Add the signature to your PDF.

Choose the signature you want to use, drag it to where you want it, then use the handles to adjust the size.

If you use iCloud Drive, your signatures are available on your other Mac computers that have iCloud Drive turned on.

### https://support.apple.com/guide/preview/fill-out-and-sign-pdf-forms-prvw35725/mac

Create a signature using your iPhone or iPad: Click iPhone or iPad. On your iPhone or iPad, sign your name using your finger or Apple Pencil. When your signature appears in the window, click

![](_page_43_Picture_0.jpeg)

### Add your signature to a PDF

- **1.**Click the Sign button in the markup toolbar, or choose Tools > Annotate > Signature.
- 2. Click Create Signature, then choose whether to use your trackpad, built-in camera, or iOS device to create a signature:
  - Click **Trackpad**, then use your trackpad to sign your name with your finger. After you sign your name, press any key on the keyboard.
  - Click Camera, then sign your name on white paper and hold it up to the camera. Your Mac will automatically scan the signature and show it in the Camera window. • Click **iPhone** (or iPad or iPod touch), then sign your name on your device's screen
  - when prompted.
- **3.**Click Done.
- 4. Choose your signature to add it to the document. You can move and resize it anywhere on the document.

## **Combining PDFs**
