Files App Overview

Files is a file management app

- Files allows users to browse local files stored within apps, as well as files stored in cloud storage services, including iCloud, Dropbox, Google Drive, and OneDrive.
- It allows for the saving, opening and organization of files, including
- placement into structured folders and sub-folders.
- iPads are able to drag-and-drop files between Files and other apps, while
- iPhone users are limited to drag-and-drop inside Files itself.
- Further organization can be done through the use of color-coded or customnamed tags, and a persistent search bar allows for finding files inside folders, though not inside other apps.

Today we covered...

- Where is the "File App" on the iPad
- Organize Files and Folders on iPad
- Get to know your files on your iPad
- How to Add/Delete files to your files app
- How to add tags color-coded or custom-named tags
- Share and collaborate with others
- Finally Reference Summary
